PROFILE

I have always been close to the IT. I'm fascinated by technological development that has been taking place extremely dynamically over the last several years. In 2019 I decided join into IT World deeper, professionally. The idea of learning to code has been grown in me for several years. I have been systematically learning front-end programming for a year. I'm also interested in web application design, I try to keep up with trends. I completed a 9-month programming course supervised by an personal mentor - Bootcamp Web Developer Plus at Kodilla. In addition to the course I have completed interesting courses on the Udemy platform. I realize that a lot of work is ahead of me, which is why I train all the time and try to develop my skills. I focus on improving skills in JavaScript and React.

TECHNOLOGY

- HTML5
- CSS3
- SASS
- RWD
- Bootstrap
